# Photovoltaics, technology of the future

In the era of climate change and scarce resources, the expansion of renewable energies is a necessary task for the future. Photovoltaic is a fundamental building block for this expansion and transformation.

The INTRA photovoltaics Systems House provides the correct materials: solar panels, control systems, and auxiliary equipment. And the corresponding services:

advice on purchasing, project management for plant construction, maintenance and repair. As a wholesale trader, the product range and services for the end customers of INTRA photovoltaics are complemented by the Systems House B2B offerings.

You can find out more about our products, our business ethos, and the pioneering technology of solar energy on the following pages. Our Systems House provides our business customers in the solar industry with a wide selection of high quality equipment.

Combine your own work in the field of environmentally friendly energy supply with our professional infrastructure, product acquisition and logistics, as well as our excellent service. This will keep your projects on the sunny side.

A handwritten signature in black ink that reads "P. Parinejad". The signature is written in a cursive, flowing style.

CEO  
INTRA photovoltaics AG

*Designing the energy  
turnaround with solar power*

# International and innovative

INTRA photovoltaics AG is part of the INTRA Group and essentially international from the outset. Solar energy complements the traditional business in the oil and gas sector. This business structure assures high reliability and financial stability to our customers.

Following the successful establishment of the project company INTRA photovoltaics AG, the wholesale trade

segment was transferred into a separate division in March 2010. We can provide you with a wide range of high quality components for the construction of photovoltaic plants through our Systems House. Thanks to our extensive experience in the engineering of major plants and private clients, we have developed a product range that can meet just about any individual requirements.

**INTRA**  
*photovoltaics*  
SYSTEMHAUS

We store system components and manage orders and deliveries at our site at Ottostraße 29 in Bochum-Wattenscheid. Furthermore, our engineers design the layouts for plants here.

Our team provides a comprehensive service - in the selection of suitable components, as a contact for advice, and throughout the entire contract.

*Convincing experience  
and continuity*

# Reliability and trust

## A Partner of the Trades

Design solar technology of the future as an installer and expand your service offerings with photovoltaic products. The INTRA photovoltaics AG Systems House provides you with a comprehensive service from a single source:

From free-of-charge plant design to the delivery of components at wholesale prices. For the trades, the INTRA photovoltaics expertise guarantees high quality technology and optimised design guidelines.

## Perfect Logistics

In our function as a wholesale trader, we organise any kind of delivery of the required components - from our extensive stock or directly from the manufacturers, by regular parcel service or by express delivery, from package freight to entire containers. Global freight forwarders ensure safe delivery of the goods to their destination. Our experience in the planning of work processes and materials management, permits us to attain the highest levels of reliability for just-in-time deliveries.

## For strong trading relationships

The INTRA photovoltaics Systems House builds upon mutual trust in all business relations. This is based on transparent communication with customers, by sustainable business relations act.

*Achieving common goals  
by cooperation*

# An experienced network

Long-term trade partnerships are a fundamental part of our success. The INTRA photovoltaics Systems House cultivates these partnerships and carefully examines all new opportunities. We carefully consider price and quality based upon our practical experience, permitting us to pass on quality, safety and price advantages to our customers.

As a trading partner of Intra photovoltaics systems company, you benefit from

- our excellent terms of delivery
- the expertise of our trade contacts and project teams
- world-class customer service and complaints
- one-stop full service

We prefer strong, well-established brands.

# Stay up-to-date

As a project developer of photovoltaic systems, we have an extensive network of suppliers, service providers and customers. Our quality-driven product catalogue is based on our experience from this work. You can find a selection of photovoltaic modules, inverters, mounting systems and accessories with detailed data sheets on our web site:

[www.intra-pv.com](http://www.intra-pv.com)

As a service provider cooperating with the INTRA photovoltaics AG Systems House, you will attain high satisfaction levels with your customers - expect referrals.

Get in touch via our telephone hotline or our website. We will be more than happy to inform you about the right services for you, and how we can optimise your workflow.

Do you have any questions?  
We would be delighted to advise you.
